PRODUCT DESCRIPTION

Vintage industrial pendant lights salvaged from a communist period factory in the Czech Republic.

Original enamel to the steel shades, they come cleaned, re-wired and fitted with a new hanging loop.

Please expect plenty of inconsistency in finish plus dents and chips to the enamel - it's all part of the look with these particular pendants.

There are small holes around the lower rim of the shades where brackets once would have been.

These lights are not sold as part of our main range and are available exclusively here in the Trainspotters Depot.
