Description

Our re-make of the classic vintage tubular steel and plywood stacking chair, widely used across the schools and church halls of mid-20th century Britain. LAST FEW AVAILABLE, BEING DISCONTINUED.

Our version is raised slightly to standard dining table height.

These chairs are a high quality UK manufactured product which is very evident in the look, feel and detail. Watch out for cheap imitations.

Please note that there is invariably some variation in timber colour and patination between individual chairs due to natural grain variation in the ply.
