PRODUCT DESCRIPTION

Light Engine II is the medium sized light source in the range. Fitted with a standard E27 base cap, this product is adaptable to a variety of glass or plastic diffusers.

- E27
- 22W
- 2000 Lumens
- 2200K to 2700K
- Less than 5% flicker
- CRI 93
- 180g

Light Engine is a range of high-performance functional light sources designed to improve upon the characteristics that halogen is revered for.

Powerful in output but compact in form, its Dim to Warm technology enables a smooth transition between 2200-2700K, while maintaining its excellent colour rendering with minimal heat emission.
